

JOB TITLE: Manufacturing Engineer

LOCATION: Dungannon, Co. Tyrone

About Kiverco:

At Kiverco we believe in a World where Recycling Plant recovers much more, much more accurately and for much longer. Kiverco is a premium brand business with an international reputation for making the World's Toughest Recycling Plant. We have been focused on making the World more sustainable for thirty years.

You will be joining the Company at an interesting time, as Kiverco has just secured some of our most exciting projects to date and we are in the process of launching a new line of revolutionary machinery.

Our Company has evolved over the years and its growth is a direct result of the hunger for creating new distinctive, bespoke, innovative products to help transform the World's waste. Our obsessive behaviour to constantly evolve our offering has meant that we have also become industry-leading experts in the field of waste processing machinery.

Kiverco delivers high quality solutions with excellent customer service globally.

The person:

We are looking for an experienced Manufacturing Engineer to collaborate and interact effectively with our Production and Engineering departments. You will be responsible for the development and improvement of existing manufacturing systems, procedures and equipment in a dynamic manufacturing environment, working to set deadlines. You will support Continuous Improvement projects and events, developing and improving processes, procedures and activities throughout Operations. The position will suit a highly motivated and organised individual who can rise to challenges and have a practical hands-on approach. You will have integrity and a fun, can-do attitude which will allow you to fit in with our well-established team.

Main Duties & Responsibilities:

- Plan, co-ordinate and implement the most efficient and cost-effective production methods required to manufacture major sub-components and completed machines
- Co-ordination of Production, Engineering and Quality Assurance Departments to establish/implement containment and route cause fixes to manufacturing issues
- Implementing best practice standard work onto the shop floor
- Build/drawing pack creation & maintenance in conjunction with Engineering Change Orders & Engineering Teams
- Liaise with cross functional departments, e.g. supply chain, engineering, quality
- Implement Lean Manufacturing principles
- Ensure current processes and all new processes encompass safe working practices
- Production support to the Manufacturing department
- Problem solving

Criteria required:

Essential

- Engineering related third level qualification
- Solid competence in use of Microsoft packages
- Knowledge of Lean Manufacturing, experience in coaching lean principles
- Excellent communication skills
- Excellent multi-tasking & attention to detail skills
- Ability to work under pressure
- Great organisational skills and self-motivated
- Logical & Methodical approach to problem solving
- Ability to work with others to meet deadlines

Desirable

- A working knowledge of ERP/MRP systems
- Experience of 3D modelling software

Rewards & benefits:

- Highly competitive salary with benefits package
